WHAT YOU NEED TO KNOW: COVID-19 3RD DOSE AND BOOSTER SHOTS

PFIZER VACCINE

- Two shots given 21 days apart (12 + years old)
- 3rd Dose is available for those with a weakened immune system (immunocompromised), and at least 28 days since the second vaccine.
- Booster shot is available for those 65+ years old, are 18+ years old with a medical condition, work at a job that has a greater risk to become infected, and had the 2nd dose of the Pfizer vaccine at least 6 months ago

MODERNA VACCINE

- Two shots given 28 days apart (18 + years old)
- 3rd Dose is available for those with a weakened immune system (immunocompromised), and at least 28 days since the second vaccine.
- Booster shot is available for those 65+ years old, are 18+ years old with a medical condition, work at a job that has a greater risk to become infected, and had the 2nd dose of the Moderna vaccine at least 6 months ago

JOHNSON & JOHNSON VACCINE

- One shot (18 + years old)
- Booster shot is available for those 18+ years old and had the 1st dose of the vaccine at least 2 months ago

The FDA and CDC support individuals receiving a booster shot that is different than the original vaccine received.
